HELICOKININ RECEPTOR FROM INSECTS

*Fig. 1*

A) Oocyte which expresses the Hv-kinin receptor

B) Oocyte with no expression

*Expression of helicokinin receptors in Xenopus oocytes.  
Signal following addition of peptide (helicokinin III,  
100nM for 20 seconds); A) oocytes after injection of  
helicokinin receptor DNA; B) control-oocyte without  
helicokinin receptor DNA*
